

Rethink, Reduce and Replenish

Ready to rethink the way your office reduces waste? We can help you choose office papers with alternative manufacturing paths that raise the sustainability factor. And, you won't have to sacrifice the quality of your printed pieces because these papers perform as well as their traditional counterparts.

Introducing sustainable alternatives!

- Tree-free papers made from sugarcane waste fiber called Bagasse. Sugarcane is an abundant and renewable resource. Bagasse is a by-product of sugarcane. Trees can take 20 or more years to mature, whereas sugarcane is usually harvested twice a year.
- Papers made from fiber that comes from forests which are managed for biodiversity and protect the rights of landowners and indigenous people. These papers are third-party certified as being produced from the fiber of forests that have met rigorous standards for protecting forestlands, communities and wildlife.
- Lower weight 18 lb. paper which uses fewer natural resources during the manufacturing process to deliver the same end-use output in high-quality office documents.

A Sugarcane Copy Paper
Biobased copy paper made from 80% sugarcane waste fiber (Bagasse) and 20% plantation fiber (Eucalyptus). Guaranteed for high quality and performance in all standard office and applicable commercial printing equipment.

| ID No. | Brightness (US/Int'l) | Sheet Size | Sheet Qty. | Weight | Unit | Price |
|--------------|-----------------------|------------|------------|--------|------|-------|
| 1 CNF-8511 * | 93 | 8½ × 11 | 2,500 | 20 lb | CT | 49.95 |

* ISO-14001 Certified Manufacturer; UNFCCC Registered; Rainforest Alliance.

B 100% Tree-Free Paper Made entirely from sugarcane by-products (Bagasse), a readily available and renewable raw material. No wood-based fibers yet performs like a traditional wood-based paper while offering a carbon footprint advantage. Tested for biodegradability and compostability according to European standard EN 13432; biodegradable in 12 weeks and can be composted commercially. Recyclable with other office papers in mainstream recycling systems. Suitable for high-volume, everyday use with jam-free performance in high-speed copiers and printers. ♻️ ♻️ ♻️
