7 QRT-73370	2.4 GHz / 32 ft	Black	3A	EA	111.13

Class 2 Laser Pointer

For use in smaller rooms and restricted use venues. The latest trend in laser pointers—Class 2—increases safety by reducing power, yet still projects a highly visible laser dot up to 150 yds. Class 2 lasers are ideal for use in institutions that regulate laser use, as they are the highest power laser allowed based on most educational and government regulations. It is never acceptable to look directly into any laser pointer beam. This lower powered laser, designed for safe use by responsible adults, allows the body's natural defenses to protect the eyes.

Class 3A Laser Pointer

For use in medium and large rooms. Class 3A laser pointers feature a brighter beam than Class 2. Designed to highlight information up to 500 yds. away.
