

## We design our steel waste receptacles with better air quality in mind

People are repeatedly exposed to indoor pollutants such as chemical emissions, respirable particles and allergens. Sources of chemical emissions may include cleaning products, furnishings and furniture, paint, textiles and building materials.

Safco steel waste receptacles are GREENGUARD Certified as low-emitting and as contributing minimal levels of pollutants to indoor environments. So choose Safco receptacles for your facility and choose healthier indoor air quality.

**A Reflections® Receptacles** These elegant metal containers will reflect well on you and your business, and they'll complement any décor. Crafted from high-quality, fire-safe steel. Manufacturer's limited lifetime warranty.

ID No.	Color	Capacity	Dia. x H	Unit	Price
